App Development | Code Referencing

Lukas Mikulec

Type of code	Source	Code lines or description
How to work with APIs in Python	https://youtu.be/9P5MY_2i7K8	I learned how to work with the module requests in Python and used these concepts when accessing AI models through API in my app,
Code for working with the object identifier AI model	https://huggingface.co/google/vit-base-patch16-224?inference_api=true	Lines 16 – 23, 31 – 33, 45 – 47 in helpers_process.py
Code for working with the translation model	https://huggingface.co/facebook/wmt19-en-de?inference_api=true	Lines 74 – 79, 88 – 92, 104 – 108 in helpers_process.py
Documentation of Streamlit	https://docs.streamlit.io/get-started	Here I learned about how specific Streamlit components work and saw how to use them in code
Session states in Streamlit	https://docs.streamlit.io/library/api-reference/session-state	Understanding this concept has been essential in making my app work.
Changing the button to disabled after interaction	https://discuss.streamlit.io/t/disable-interactables-after-suitable-interaction/45604	Line 22, 37, 101, 108 in main_app.py
Retrieving names of uploaded files	https://docs.streamlit.io/knowledge-base/using-streamlit/retrieve-filename-uploaded	Line 147, 157 in helpers_process.py
Idea how to make the social sharing button

Guide from Twitter for understanding the HTML code | https://discuss.streamlit.io/t/has-anyone-implemented-a-social-sharing-widget/20778

https://publish.twitter.com/# | Lines 23 – 39 in helpers_small_functions.py |
| How to save audio files from API responses | https://youtu.be/_j7JEDWuqLE?feature=shared&t=408 | Lines 105, 106 in helpers_quiz_generator.py |

How to get the current day and time for the file name	https://www.geeksforgeeks.org/python-strftime-function/	Line 101 in helpers_quiz_generator.py
Headers for API for Streamlit cloud	https://discuss.streamlit.io/t/my-app-works-locally-but-fails-to-work-when-deployed/35724/6	Lines 18 – 21, 76 – 79 in helpers_process.py Lines 23 – 26, 70 – 73 in helpers_quiz_generator.py
Animations in Streamlit	https://youtu.be/gk5gS47DcYs?feature=shared	Lines 75, 82, 89 in main_app.py
Change the size limit for uploading files	https://docs.streamlit.io/knowledge-base/deploy/increase-file-uploader-limit-streamlit-cloud	Lines 8, 9 in config.toml

Notes:

- If there is some other code I got inspired by that is not listed here (should I have forgotten to note down anything), it came from Google Bard. I used Bard only to consult code-specific details, research possible options for solving a problem, or help me remember function names and syntax, not to replace me in writing my code.
